The *fourier-orns* package

Michel Bovani

Fourier-GUTenberg provides several logos and ornaments: they are now usable by those who do not want to use the Fourier-GUTenberg font system. In this case, just call the *fourier-orns* package (`\usepackage{fourier-orns}`). Remember that:

+ You have to install Fourier-GUTenberg anyway.
+ If you call *fourier*, you should *not* call *fourier-orns*, because *fourier* will do it anyway. All the commands described here may be used with *fourier*.

Thanks to Daniel Flipo ([daniel.flipo@free.fr](mailto:daniel.flipo@free.fr)), there are now open-type versions of the fourier ornaments fonts. Those fonts are automatically selected an the *fontspec* package is called, when the `\TeX` engine is lua\TeX{} or Xe\TeX{}.

Here are the provided symbols:

+ A variant of the euro symbol: `\eurologo €, €.`

  Please note that the `\textit` command will not change the slant of this symbol, but `\textsl{\eurologo} €` will do it.

+ A “starred” bullet `\starredbullet:` used as the item mark in this document.

+ Smileys typesetted in \LARGE size:

  `\grimace 😞 `
+ Decos and logos typesetted in \texttt{\LARGE} size:

\texttt{\noway} \quad \texttt{\warning} \quad !
\texttt{\textxswup} \quad \texttt{\textxswdown} \quad X
\texttt{\decoone} \quad \texttt{\decotwo} \quad ?
\texttt{\decothreeleft} \quad \texttt{\decothreeright} \quad \}
\texttt{\decofourleft} \quad \texttt{\decofourright} \quad ?
\texttt{\floweroneleft} \quad \texttt{\floweroneright} \quad C
\texttt{\lefthand} \quad \texttt{\righthand} \quad %
\texttt{\decosix} \quad \texttt{\bomb} \quad \$

⚠️ The old command \texttt{\danger} (fourier-orns 1.1) is now deprecated: use \texttt{\warning} instead. Note that \texttt{\danger} is still usable, provided you don't use the \texttt{unicode-math} package.

+ Leaves typesetted in \texttt{\LARGE} size:

\texttt{\leafleft} \quad \texttt{\leafright}
\texttt{\leafNW} \quad \texttt{\leafNE}
\texttt{\leafSE} \quad \texttt{\leafSW}
\texttt{\aldineleft} \quad \texttt{\aldineright}
\texttt{\aldine} \quad \texttt{\aldinesmall}

+ A complete set of old style pilcrow here in \texttt{\LARGE} size:

\texttt{\oldpilcrowone} \quad \texttt{\oldpilcrowfive} \quad \$
\texttt{\oldpilcrowtwo} \quad \texttt{\oldpilcrowsix} \quad \$
\texttt{\oldpilcrowthree} \quad \texttt{\oldpilcrowfour} \quad \$

Old pilcrow “with tails” can be used like that:

\texttt{\definecolor{newred}{cmyk}{0,1,1,0.1}}
\texttt{\noindent \textcolor{newred}{\oldpilcrowfour},We few, we happy few, we band of brothers;}
\texttt{\textcolor{newred}{\oldpilcrowfive},For he to-day that sheds his blood with me}
\texttt{\textcolor{newred}{\oldpilcrowsix},Shall be my brother; be he ne’er so vile,}
\texttt{\textcolor{newred}{\oldpilcrowfour},This day shall gentle his}
We few, we happy few, we band of brothers; for he to-day that sheds his blood with me shall be my brother; be he ne’er so vile, this day shall gentle his condition.
