

Package ‘RcppStreams’

February 25, 2019

Type Package

Title 'Rcpp' Integration of the 'Streamulus' 'DSEL' for Stream Processing

Version 0.1.3

Date 2019-02-24

Author Dirk Eddelbuettel <edd@debian.org>

Maintainer Dirk Eddelbuettel <edd@debian.org>

Description The 'Streamulus' (template, header-only) library by Irit Katriel (at <<https://github.com/iritkatriel/streamulus>>) provides a very powerful yet convenient framework for stream processing. This package connects 'Streamulus' to R by providing both the header files and all examples.

R topics documented:

commonSubexpressions	2
crossAlert	2
helloStream	3
slidingWindow	4

Index	5
--------------	----------

commonSubexpressions *Common 'greeting' carried across several expressions*

Description

This is an example function illustrating Streamulus

Usage

```
commonSubexpressions()
```

Value

An unconditional TRUE value

Author(s)

Dirk Eddelbuettel

Examples

```
## Not run:  
commonSubexpressions()  
  
## End(Not run)
```

crossAlert *Alert for cross of two moving averages*

Description

This is an example function illustrating Streamulus

Usage

```
crossAlert(f1, f2)
```

Arguments

f1	Parameter for the slower exponential moving average
f2	Parameter for the faster exponential moving average

Value

An unconditional TRUE value

Author(s)

Dirk Eddelbuettel

Examples

```
## Not run:  
crossAlert(10,20)  
  
## End(Not run)
```

helloStream	<i>Print some hello messages</i>
-------------	----------------------------------

Description

This is an example function illustrating Streamulus

Usage

```
helloStream()
```

Value

An unconditional TRUE value

Author(s)

Dirk Eddelbuettel

Examples

```
## Not run:  
helloStream()  
  
## End(Not run)
```

`slidingWindow`*Sliding window function example*

Description

This is an example function illustrating Streamulus

Usage

```
slidingWindow()
```

Value

An unconditional TRUE value

Author(s)

Dirk Eddelbuettel

Examples

```
## Not run:  
slidingWindow()  
  
## End(Not run)
```
